Product Specification

Designed to offer superior protection the SmartBar Under Vehicle Armour (UVA) is a complete replacement of the vehicle OE skid pan. The UVA is designed specifically to suit The Ford Ranger PXII, PXIII and Ford Everest.

* Not inclusive of recovery point fit time.

Protection & Styling Characteristics:

- Weight savings provide improved fuel economy and reduced tyre, suspension and brake wear when compared to other after market alternatives
- Fitted Weight of **8.6kg**
- Easy disassembly for vehicle service access
- Deep rib structure provides continual strength through entirety of UVA
- Increased protection against impact to inner CV joints
- Reinforcing bracketry to protect transfer case against impact
- Heat resistant material
- UV stabilised polymer for durability and corrosion resistance
- Styled to complement the vehicle's aesthetic
- Proudly designed and manufactured in Australia
- Minimal repair costs after impact
- Available in black
- Compatible with ARB recovery point
- Freight Information: 1230mm x 870mm x 150mm - 23kg

Lightweight:

The SmartBar UVA weighs 8.6kg more than the OE skidpan and up to half the weight of competing products whilst providing superior protection.

Non corrosive:

The SmartBar UVA is manufactured using a heavy duty polymer that is non-corrosive, chip and rust resistant.

Compatibility:

The SmartBar UVA is compatible with the Ford Ranger PX, PXII and PXIII, the Ford Everest from 2015 onwards.

Compatible with OE Bumper, ARB and SmartBar Products.

Recovery Point:

The SmartBar UVA is compatible with the ARB recovery point.

Strength:

The shape of the SmartBar UVA is designed specifically to increase the products strength against impact. The UVA is supported directly against the chassis with added bracketry.

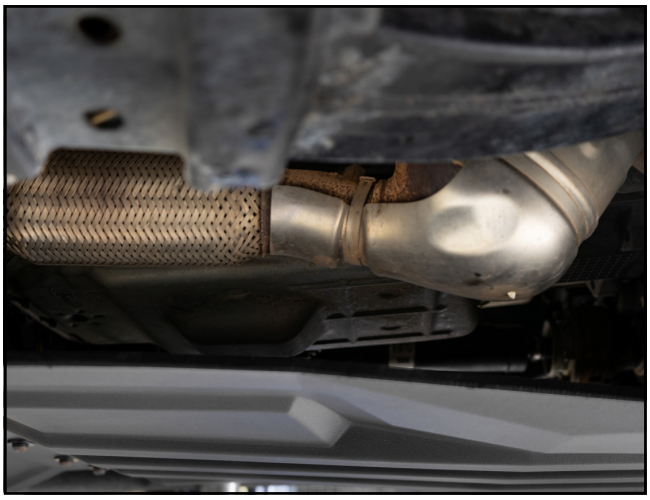

Heat Resistant

The UVA is resistant against vehicle exhaust heat.

DPF regeneration can be preformed with the SmartBar UVA installed.

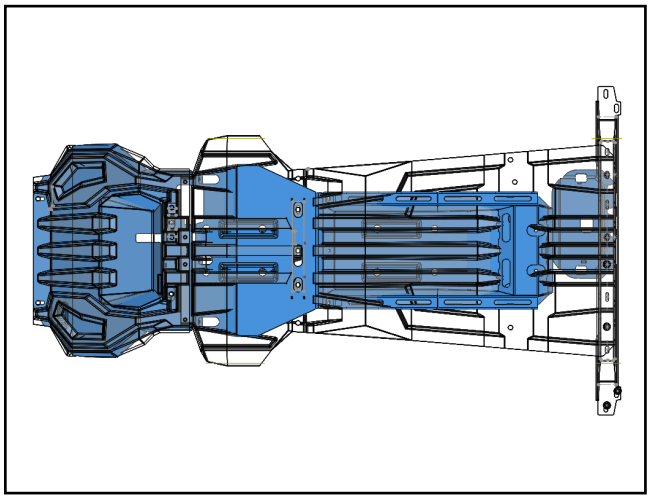

Refer vehicle owners manual for safe DPF regeneration processes.

Protection:

The SmartBar UVA provides an increased coverage of the under-body of the vehicle compared to alternative products, resulting in superior protection to vehicle components.

Alternative product in blue underlay.

Serviceability:

Made up from three individual parts, the UVA is designed for serviceability. Each piece has been designed so that it can be removed easily to allow individual access to different parts of the vehicle for servicing.

Image shows centre piece removed for oil change.

Installation:

The SmartBar UVA completely replaces the OE skid pan and is easy to install.
